

# 4x4 Center

## Some things you will learn:

1. Understanding how accidents happen.
2. Exposure to the 5 ways cars skid.
3. How to use the throttle to transfer weight and regain steering control.
4. Emergency evasive maneuvers.
5. How to prepare your vehicle for safe winter driving.

A Winter Safe course at The 4x4 Center Driving School is a great idea for new drivers, teenage drivers, and seasoned drivers alike. A few hours with us can completely change your confidence for a lifetime of winter driving. The skills we teach are invaluable, and the experience is unforgettable.

# Winter Safe Driving Experience

Have you ever felt nervous or “out-of-control” while driving on winter roads?

Let us teach you how to drive with control and confidence to stay on the road and avoid accidents.

Every course starts with a presentation to establish some basic principles of driving techniques and vehicle dynamics. Only then can you master the critical relationships between the driver and the vehicle and the road.

Some of the topics we will cover include basic driving techniques, vehicle dynamics, vehicle systems, how cars “skid”, how to avoid obstacles, and how to keep your vehicle ready for winter. In the field, using our prepared surfaces you will take what you learned in the classroom and apply it to some exciting exercises that simulate difficult winter driving conditions.
